

ECDL, OPCALIA and the FORMALIA 2008 Program

In 2008, **OPCALIA** of the **Normandy** Region decided to initiate **FORMALIA 2008**, a program for formal training as well as for **high quality training that includes ECDL program**. The goal was to encourage companies to enroll their staff into training and to build individual training

programs leading to certification thereby giving greater efficiency to training programs.

Results of the training program financed by the ESF, the State and the Normandy Region were very positive. Candidates are very satisfied in having attended a training in line with their real needs and leading to a certification which recognizes their acquired skills.

OPCALIA is going to renew the training program with **Formalia 2009**, integrating the ECDL certification for computer skills.

Annie GRENIER, Head of Training says "*Commitment by both the employee and the employer to try the ECDL certification is a mandatory requirement to join training on computer skills of the FORMALIA program*".

Key words : individual training, high quality, greater efficiency, leading certification, commitment, renew

Description : OPCALIA is going to renew the training program with "Formalia 2009"

Date : December 2008
